CINERGY 2000 ™
SCHEDULING

Plan your shoot with Cinergy 2000 Scheduling! The Cinergy 2000 system reads your ScriptThing, Movie Magic Screenwriter, Hollywood Screenwriter, Final Draft, or Scriptware script and instantly generates a script breakdown and stripboard. Then, view the script from within Cinergy to add additional breakdown elements and adjust your shooting schedule. An integrated script editor evens allows you to modify scenes just before shooting. Maintain cast and crew list, crew requirements, and production information in an intuitive yet powerful interface.   Easily track the completion status of your scenes on each day. Create a variety of reports that can be securely published to the Internet for the benefit of your cast and crew using Mindstar's CinergyOnline™ service. Advanced data protection functionality ensures your valuable information is safe from events such a power loss. Seamlessly transfer your scheduling information to Cinergy 2000's Budgeting, On-Set or Post Production application modules for a complete production management solution. Cinergy 2000 Scheduling provides you with all of the tools necessary to manage your pre-production needs.
